**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Huppenthal et al (US 5,491,300).

Huppenthal et al disclose a member (40) having a through hole (50), a flat cable (22) being inserted in the through hole, a seal (44, 42) for sealing a gap between the hole and the flat cable, the seal made of rubber (col. 5, lines 60-65)

The limitations of “ a liquid rubber material which is cured and formed at the normal temperature and under normal pressure and subjected to a physical action which includes irradiation of UV ray, electron beams radiation or high frequency” have been considered, but does not result in a structural difference. The presence of process limitations in product claims, which product does not otherwise patentably distinguish over prior art, cannot impart patentability to that product. In re Stephens 145 USPQ 656 (CCPA 1965).
